USB connector to PC

Quick Setup

Begin

Step 1 Charge the Battery

Connect your iPod to the iPod Power Adapter ❶
using the iPod Dock Connector to FireWire
Cable ❷. Charge from two to four hours. Remove
the cable when done charging.

Step 2 Install the Software

Insert the iPod CD in your PC and follow the
onscreen instructions to install iTunes and the
iPod software.

When asked by the installer, connect your iPod to
the PC using the iPod Dock Connector to USB 2.0
Cable ❸. It might take a few seconds to be
recognized. See the *User's Guide* for other
connection options.

Import

Step 3 Import Music to Your PC

There are three ways to get music into Apple iTunes:

Import music from your PC
• First check to see if you already have music in
iTunes. If you selected to find music files during
setup, your music was imported.

• If not, open iTunes and drag your *My Music*
folder into the iTunes Library in the *Source* list.

• See the *User's Guide* to learn more about
file types.

Import music from your favorite CD
• Open iTunes.

• Insert your audio CD.

• Select the CD title in the iTunes *Source* list and
click the **Import** icon.

**Buy music from iTunes (available in some
countries/regions only)**
• Open iTunes.

• Make sure you have a live connection to
the Internet.

• Click **Music Store** in the iTunes *Source* list.

• Click **Account Sign In** and follow the instructions.

Transfer and Play

Step 4 Transfer Music to Your iPod

Make sure your iPod is connected to your PC.
Click **File** from the iTunes menu bar and select
Update Songs on your iPod.

Step 5 Play

Use the Click Wheel and Select button to browse
for a song. Press the Play or the Select button
and enjoy.
